

Measures, Attributes, and Hierarchies

1. Measures and Aggregation Methods

FACT_ORDER_ITEM

Measure	Business Description	Default Aggregation
PRICE	Value/Price for a given product/offer	SUM (Revenue), AVG (Average price)
QUANTITY	Quantity of ordered items	SUM
VAT	VAT tax amount	SUM
DISCOUNT_PERCENT	Applied discount in percentage	AVG, MAX

FACT_DELIVERY_ITEM

Measure	Business Description	Default Aggregation
PLANNED_QUANTITY	Quantity planned for delivery	SUM
PACKED_QUANTITY	Quantity actually packed	SUM
PRODUCT_PRICE	Value of the product in delivery	SUM

FACT_CLAIM_ITEM

Measure	Business Description	Default Aggregation
AGREED_RETURN_AMOUNT	Agreed return amount for the customer	SUM
ORDERED_QUANTITY	Initially ordered quantity (context)	SUM, MAX
DELIVERED_QUANTITY	Actually delivered quantity (context)	SUM, MAX
NUMBER_OF_PRODUCTS_WITH_ACCEPTED_CLAIM	Number of accepted products in the claim	SUM
CLAIMED_QUANTITY	Quantity reported in the claim	SUM

FACT_PAYMENT & FACT_REFUND_ITEM

Measure	Business Description	Default Aggregation
AMOUNT (PAYMENT)	Booked payment amount	SUM
AMOUNT (REFUND)	Actual refund amount (net/gross)	SUM

Measure	Business Description	Default Aggregation
VAT_AMOUNT	Refunded VAT amount	SUM
MISSING_PRODUCT_QUANTITY	Quantity of missing products forming the basis of the refund	SUM

FACT_PLANNER_ITEM

Measure	Business Description	Default Aggregation
QUANTITY	Number of items in the subscription plan	SUM
DURATION_DAYS	Duration of the plan / cycle	AVG, MAX

2. Key Attributes

Spatial and Logistics Attributes (GIS)

Tables: DIM_SITE, DIM_CUSTOMER_ADDRESS, DIM_COMPETITORS

- **Categorizing:** CITY, ZIPCODE, STATE, COUNTRY, STREET.
- **GIS (Coordinates):** LATITUDE, LONGITUDE, GEO_POINT.
- **Reach Indicators in DIM_CUSTOMER:**
 - DIST_TO_NEAREST_OWN_SITE_M, DIST_TO_NEAREST_COMP_BAKERY_M
 - COMP_BAKERY_COUNT_500M, OWN_SITE_COUNT_1000M

Product and Marketing Attributes

Tables: DIM_PRODUCT, DIM_OFFER, DIM_DISCOUNT, DIM_INGREDIENT

- **Categorizing:** PRODUCT_TYPE_NAME, TYPE (in offer), CATEGORY (Competitors).
- **Technical/Nutritional:** CALORIES, TOTAL_FATS, SUGAR.
- **Promotional:** DISCOUNT_CODE, ONLY_FOR_FIRST_PURCHASE.

Status Attributes

- **In orders:** ORDER_ITEM_STATE, ORDER_STATE, MODIFIED_BY_HAND.
- **In payments:** TYPE, CARD_BRAND, MOBILE.
- **In claims:** STATE, ISSUE_TYPE.

3. Analytical Hierarchies

A. Time Hierarchy (DIM_DATE)

1. YEAR
2. QUARTER
3. MONTH_NAME / MONTH_NUMBER
4. WEEKDAY_NAME / WEEKDAY_NUMBER

5. SK_DATE

B. Geographical Hierarchy

1. COUNTRY
2. STATE
3. CITY
4. ZIPCODE
5. STREET / ADDRESS

C. Operational-Management Hierarchy

1. DIM_LOCATION
2. DIM_SITE (Note: *DIM_DELIVERY_MAN* and *DIM_CUSTOMER* are independent dimensions. They are linked to a specific site dynamically per transaction via Fact tables, because a customer can order from multiple sites.)

D. Product-Offer Hierarchy

1. DIM_OFFER
2. DIM_PRODUCT
3. DIM_INGREDIENT / DIM_ALLERGEN (Note: These relationships are Many-to-Many (N:M) resolved via Bridge tables like *BRIDGE_OFFER_PRODUCT*, meaning a single product can belong to multiple offers, and an ingredient to multiple products.)
